

Recruitment Process Management System

1. Job Creation & Position Management

- Recruiters can **create job openings**.
- Define job details, including **minimum required skills, preferred skills, and other criteria**.
- Ability to **add/update skills** and link them to positions.
- Open positions can be **put on hold or closed**, with reasons documented.
- If a position is closed, it should be linked to the **selected candidate** or contain a **comment explaining the closure**.

2. Candidate Profile Management

- Recruiters will **upload candidate profiles** in various ways:
 - **Automatic profile creation** from CVs.
 - **Excel sheet upload** for bulk candidate entry.
 - **Manual profile creation** if needed.
- All **CVs and profiles are stored** in a **data bank** for future reference.
- Candidates can be **linked to open positions** based on skills and job requirements.

3. Resume Screening & Shortlisting

- CVs will be **reviewed** by a reviewer assigned to the open position.
- Recruiters and technical reviewers can **add comments** at the review stage.
- Recruiters and interviewers can **tick the skills a candidate possesses** and **specify years of experience** for each skill.
- Reviewers can be **assigned to open positions** for screening.
- Shortlisted candidates will be **moved to the interview stage**, and interviewers will be assigned.
- If a candidate was **screened or interviewed previously**, there should be a **notification at the screening and interview stage**.

4. Interview Scheduling & Process

- Define the **number of interview rounds** for each position (default or customized per candidate).
- **Types of interviews:**
 - **Technical round** (skill evaluation).
 - **HR round** (soft skills, culture fit, and final negotiation).
- Recruiters can **schedule online tests** (Online Examination Module) before the interview.

- Interview scheduling will trigger **meeting invites** to recruiters, technical interviewers, and candidates.
- **Bulk interview events (walk-ins or campus recruitment)** can be scheduled, and events will be **tracked separately**.
- **Interviews should support panel interviews**, where multiple interviewers assess a candidate simultaneously.

5. Feedback & Evaluation

- **Interviewers can add feedback** after each round.
- Feedback includes:
 - **Ratings against technologies** applicable to the position.
 - **Text descriptions** for detailed evaluations.
- HRs and reviewers can **add feedback** at relevant stages.
- **Automated scoring mechanisms** can be integrated for standardized evaluation.

6. Document Verification & Final Selection

- Shortlisted candidates can **upload documents** to the portal.
- HRs can **verify documents** and mark **background verification status**.
- Once selected, the **joining date** is provided to the candidate.
- Upon joining, the candidate's profile is **moved to the employee records** table.
- **Offer letters** can be generated and sent via the system.

7. Status Management & Notifications

- At any stage, a profile can be moved to **"On Hold"**, requiring a reason.
- As a candidate progresses through different stages, **relevant stakeholders get notified via email**.
- **Automated reminders** can be triggered for pending actions at each stage.

8. User Roles & Access Control

- Different roles with defined access levels:
 - **Recruiter** – Manages job openings, candidate profiles, interviews
 - **HR** – culture fit, final negotiation, documentation and background verification
 - **Interviewer** – Provides interview feedback.
 - **Reviewer** – Screens CVs and shortlists candidates.
 - **Admin/Super Admin** – Manages users, roles, and system-wide configurations.
 - **Candidate** – Views job openings, uploads CVs, and submits documents.
 - **Viewer** – Read-only access to all data.

- **Role-based access control (RBAC)** ensures users can only access relevant sections of the system.

9. Reporting & Analytics

- Generate various reports, including:
 - **Position-wise reports**
 - **College-wise report**
 - **Candidate process summary**
 - **Interviewer summary**
 - **Date-wise summary**
 - **Technology-wise profiles**
 - **Experience-wise candidate lists**
- **Custom reporting and dashboard views** should be available for administrators and HRs.
